Profile

Dedicated Unity Game & VR Developer with 2 years of hands-on experience developing interactive games and immersive experiences. Skilled in C#, Unity, game design, and XR technologies including Meta Quest and OpenXR. Passionate about creating engaging gameplay experiences and continuously improving technical skills in game and VR development.

Experience

- 01/2025 – Present

3C Coding School, Unity Game Instructor

Designed and delivered practical lessons covering C#, game development fundamentals, and AR/VR integration with Meta Quest and OpenXR.

Mentored and guided students through Unity-based 2D and 3D game projects, focusing on gameplay implementation, clean code practices, and problem-solving.
- SanabelApps, Intern**

Contributed to the development and optimization of mobile games using Unity and C#, focusing on gameplay functionality and performance.

Implemented responsive UI and core gameplay logic based on design specifications, ensuring compatibility across different mobile devices.

Conducted QA testing, identified gameplay bugs, and collaborated on debugging issues to improve game stability and overall user experience.
- Personal Unity Game Projects**

Developed and published multiple independent Unity game prototypes, implementing game loop architecture, gameplay mechanics, UI systems, and player interaction systems.

Applied C# best practices and Unity development principles to build, test, and continuously improve gameplay experiences.

Education

- 2021

Bachelor of Science, Helwan University

Key Skills

- Unity Engine — 2D & 3D Game Development
 - AR/VR Development
 - Git & GitHub — Version Control & Collaboration

- C# Programming — Object-Oriented Programming (OOP)
 - UI Development — Unity UI & Interactive Systems

- Gameplay Development — Game Mechanics & Level Design
 - Debugging & Optimization — Problem Solving & Performance Optimization

Projects

Photobooth, Scan the Card, Amigo, Snake, Breakout, Rat Runner, Bowling, Focus, Maze, HotPotato, Simon Game
